

NEW YORK STATE DEPARTMENT OF HEALTH COMMUNICABLE DISEASE REPORTING REQUIREMENTS

Reporting of suspected or confirmed communicable diseases is mandated under the New York State Sanitary Code (10NYCRR 2.10). The primary responsibility for reporting rests with the physician; moreover, laboratories (PHL 2102), school nurses (10NYCRR 2.12), day care center directors, nursing homes/hospitals (10NYCRR 405.3d) and state institutions (10NYCRR 2.10a) or other locations providing health services (10NYCRR 2.12) are also required to report the diseases listed below.

Amebiasis	Pregnant hepatitis B carrier	Salmonellosis	Group B strep
☞ Animal bites for which rabies prophylaxis is given ¹	Herpes infection, infants aged 60 days or younger	☞ Severe Acute Respiratory Syndrome (SARS)	Streptococcus pneumoniae
☞ Anthrax ²	Hospital associated infections (as defined in section 2.2 10NYCRR)	Shigatoxin-producing infection ⁴	☞ Syphilis, specify stage ⁷
☞ Arboviral infection ³	Influenza, laboratory-confirmed	Shigellosis ⁴	Tetanus
Babesiosis	Legionellosis	☞ Smallpox ²	Toxic shock syndrome
☞ Botulism ²	Listeriosis	Staphylococcus aureus ⁶ (due to strains showing reduced susceptibility or resistance to vancomycin)	Transmissible spongiform encephalopathies ⁸
☞ Brucellosis ²	Lyme disease	☞ Staphylococcal enterotoxin B poisoning ²	Trichinosis
Campylobacteriosis	Lymphogranuloma venereum	Streptococcal infection (invasive disease) ⁵	☞ Tuberculosis current disease (specify site)
Chancroid	Malaria	Group A beta-hemolytic strep	☞ Tularemia ²
Chlamydia trachomatis infection	☞ Measles		☞ Typhoid
☞ Cholera	☞ Melioidosis ²		Vibriosis ⁶
Cryptosporidiosis	Meningitis		☞ Vaccinia disease ⁹
Cyclosporiasis	Aseptic or viral		☞ Viral hemorrhagic fever ²
☞ Diphtheria	☞ Haemophilus		Yersiniosis
E. coli O157:H7 infection ⁴	☞ Meningococcal		
Ehrlichiosis	Other (specify type)		
☞ Encephalitis	☞ Meningococcemia		
☞ Foodborne illness	☞ Monkeypox		
Giardiasis	Mumps		
☞ Glanders ²	Pertussis		
Gonococcal infection	☞ Plague ²		
Haemophilus influenzae ⁵ (invasive disease)	☞ Poliomyelitis		
☞ Hantavirus disease	Psittacosis		
Hemolytic uremic syndrome	☞ Q Fever ²		
Hepatitis A	☞ Rabies		
☞ Hepatitis A in a food handler	Rocky Mountain spotted fever		
Hepatitis B, C (specify acute or chronic)	☞ Rubella (including congenital rubella syndrome)		

- 1 Local health department must be notified prior to initiating rabies prophylaxis.
- 2 Diseases that are possible indicators of bioterrorism.
- 3 Including, but not limited to, infections caused by eastern equine encephalitis virus, western equine encephalitis virus, West Nile virus, St. Louis encephalitis virus, La Crosse virus, Powassan virus, Jamestown Canyon virus, dengue and yellow fever.
- 4 Positive shigatoxin test results should be reported as presumptive evidence of disease.
- 5 Only report cases with positive cultures from blood, CSF, joint, peritoneal or pleural fluid. Do not report cases with positive cultures from skin, saliva, sputum or throat.
- 6 Proposed addition to list.
- 7 Any non-treponemal test \geq 1:16 or any positive primary or secondary stage disease or prenatal or delivery test result regardless of titer should be reported by phone; all others may be reported by mail.
- 8 Including Creutzfeldt-Jakob disease. Cases should be reported directly to the New York State Department of Health Alzheimer's Disease and Other Dementias Registry at (518) 473-7817 upon suspicion of disease. In NYC, cases should also be reported to the NYCDOHMH.
- 9 persons with vaccinia infection due to contact transmission, and persons with the following complications from vaccination: eczema vaccinatum, erythema multiforme major or Stevens-Johnson syndrome, fetal vaccinia, generalized vaccinia, inadvertent inoculation, ocular vaccinia, post-vaccinial encephalitis or encephalomyelitis, progressive vaccinia, pyogenic infection of the infection site, and any other serious adverse events.

SPECIAL NOTES

- Diseases listed in **bold type** (☞) warrant prompt action and should be reported **immediately** to local health departments by phone followed by submission of the confidential case report form (DOH-389). In NYC use case report form 395V.
- In addition to the diseases listed above, any unusual disease (defined as a newly apparent or emerging disease or syndrome that could possibly be caused by a transmissible infectious agent or microbial toxin) is reportable.
- Outbreaks: while individual cases of some diseases (e.g., streptococcal sore throat, head lice, impetigo, scabies and pneumonia) are not reportable, a cluster or outbreak of cases of any communicable disease is a reportable event.
- **Cases of HIV infection, HIV-related illness and AIDS are reportable to:**
Division of Epidemiology
P.O. Box 2073, ESP Station
Albany, NY 12220-2073
(518) 474-4284
In New York City: New York City Department of Health and Mental Hygiene
For HIV/AIDS reporting, call:

For more information on disease reporting, call your local health department or the New York State Department of Health Bureau of Communicable Disease Control at (518) 473-4439 or (866) 881-2809 after hours. In New York City, 1 (866) NYC-DOH1.

To obtain reporting forms (DOH-389), call (518) 474-0548.

WHO SHOULD REPORT?

Physicians, nurses, laboratory directors, infection control practitioners, health care facilities, state institutions, schools.

WHERE SHOULD REPORT BE MADE?

Report to local health department where patient resides.

Contact Person Heather A. Lindstrom, PhD
Name/Address Erie County Dept. of Health
95 Franklin St. Rm.978
Buffalo, NY 14202
Phone 716-858-7697
Fax 716-858-7964
Email lindsth2@erie.gov

WHEN SHOULD REPORT BE MADE?

Within 24 hours of diagnosis:

- phone diseases in bold type,
- mail case report, DOH-389, for all other diseases.
- in New York City use form 395V.
